PROJECTS

Customized Handmade Gift Store

2024

A web application designed to provide a platform for users to browse and purchase unique handmade gifts. Features include user-friendly product listings, a shopping cart system, and secure checkout functionality, offering a seamless and personalized shopping experience for customers. Developed using React JS, Express JS, Node JS & MongoDB.

Tournament Finder

2022

A platform for sports enthusiasts to discover and participate in tournaments. Features include event posting by organizers, participant registration with ID verification, secure token-based participation, and email notifications. Developed using HTML, CSS, Python and SQLite.
